# SUSTAINABLE FOOD AND BEVERAGE MANUFACTURING WORKSHOP

This invitation-only event will help you take your facility to the next level of sustainability, efficiency and energy savings.

The workshop offers:

- **energy efficiency** opportunities for food manufacturers
- **renewable energy:** take your facility to net-zero energy
- **water conservation:** benefits of proper water chemistry in water and wastewater treatment systems
- **waste reduction and waste diversion** best practices case studies
- **safer sanitation** methods through effective alternatives
- **LEAN** for food and beverage manufacturing

All attendees will have the opportunity for a free on-site assessment.
